## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: None of the relevant prior art teaches the applicants claimed invention. Roberts discloses a thermal switch with rivets 20 and terminal 18 and 19 and an intervening bimetallic structure 17 that breaks contact upon reaching a certain temperature. Applicant however claims a switch with a structure 8 and bolts 5 with associated terminals. The mutual expansion of both bolts and structure 8 across a given distance at predetermined temperatures completes an electrical contact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **EXAMINER'S AMENDMENT**

The application has been amended as follows: The title of the application has been amended to read: "Temperature warning device by deformation or expansion of a bolt and the device structure".

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sampson Helfgott on 18 June 2008. The article "the" will be removed prior to "blind orifices" and "cylindrical ledges" will be deleted in claim 4 to over a lack of antecedent.
